

Where Speed
Meets Human
Expertise

90% Complete | Fully Bootstrapped

Human Expertise. AI Speed.

Our Mission

Helpdesk exists to bridge the gap between automation and human connection — delivering fast, accurate support from real people when it matters most.

Why Now

AI tools are fast, but they lack **understanding, cultural context, and empathy**. Forums and search results often assume too much — leaving people stuck

What We Believe

We believe that in a world increasingly dominated by automation, **real human interaction isn't a fallback – it's the foundation**

Not everything can be solved with keywords & Code

What Is Helpdesk?

Helpdesk is an on-demand support platform that connects users with real human experts who provide instant help over video, audio, or screen sharing calls.

Whether it's tech support, fixing something at home, getting help with a math problem, or translating in a foreign country — Helpdesk gets you help when Google or AI can't.

When you don't know the right keywords — Helpdesk still knows what to do.

Key Features

Real time support via video, audio, or screen sharing

Verified human experts, not bots or forums

Localized help that respects context, culture, and region-specific challenges

Cross category assistance — tech, education, DIY, translation

The Problem

Traditional Tools Are Failing People

Knowing what to ask is the first problem

Most people don't know the technical term for their issue.

If you don't type the right keywords, Google and AI tools don't know how to help.

Automation falls short

AI lacks context, forums lack empathy.

Most users don't want 10 possible answers – they want one correct one, right now.

Traditional support is slow & inconsistent

Call centers are delayed, region-specific, and frustrating to deal with.

Forums are filled with outdated advice or conflicting opinions.

Every search tool works well – if you know *exactly* what to ask for

The Fix

No Keywords Needed

Users don't need to know the right terminology – they instead explain what's wrong in their own words.

Helpdesk connects them to someone who already knows what to ask and look for.

Real-Time, Human Expertise

Verified experts walk users through their issues – *Instantly*.

No conflicting answers.
No overthinking.

Just human problem-solving, done right.

Smarter Than Support Centers

Instant availability, no hold times, no call routing, and definitely no IVR.

Localized, practical, and relevant guidance – from people who get it.

We bring back the human touch that automation forgot.

AI Is Booming – But People Still Want People

81%

Of consumers would rather wait to speak with a human rather than instantly speak to an AI agent

Fast Company, 2024 ¹

70%

Don't trust AI to provide the same accuracy as humans in customer experience

SurveyMonkey, 2024 ²

71%

Expect companies to offer personalized interactions

Helpshift, 2024 ³

64%

Prefer companies not use AI in customer service at all

Gartner, 2023 ⁴

53%

Stated they prefer to chat with a live agent via the phone when it comes to complex customer service questions

Business Wire, 2023 ⁵

Helpdesk fills the void between automation and human understanding

A Multi Billion Dollar Opportunity Built on Human Expertise

\$455 Bn

Global gig economy

- \$455 Bn in 2023, growing at 17% Y-o-Y ⁶
- Broader estimates including offline gig work put it at ~\$3.8 trillion in 2022 ⁷
- Nearly 47% of all freelancers offer knowledge services ⁷

\$79.4
Bn

Global CX Outsourcing

The market is expected to reach \$205bn in 2032 ⁸

12% of the global labor force are gig workers ⁷

Helpdesk's Advantage

- ✓ Addresses both B2C and B2B
- ✓ Taps into high-frequency use cases

helpdesk

Platforms like Fiverr & Upwork validated the freelance model, but lack real-time functionality.

Helpdesk introduces the same monetization – but live, instant, and scalable.

Built for scale with localized human insight

Structured monetization, unlike volunteer-led

Market Opportunity

Massive global demand, high regional readiness, and UAE-first entry

TAM (Global)
\$352.4Bn

500.1Bn by 2030

Global call center & real
time support market

~5.3Bn internet users
globally (~66% of the global
population)

SAM (MENA)
\$6.3Bn

Across Middle East & Africa (2024
est.)

2% of global support
revenues

348Mn internet users in
Arab region (70%
penetration)

SOM (UAE)
\$4.3Bn

support outsourcing market (2024)

Near universal internet
adoption (11.1Mn users,
~99%)

Only The Beginning

Basic Tech

“My browser keeps crashing”

Target: Elderly, less tech savvy individuals

- Tech helpers don't require formal vetting
- Simple problems, instant answers
- Frees family members from constantly being the “tech guy”

Education

“I'm stuck on this one question from my practice test”

Target: High school & university students during mock/prep

- On demand help, no scheduling or hourly packages
- Tutors / helpers only need subject-specific certifications
- Tailored to regional curriculum

DIY

“What do the wires on my ceiling fan mean?”

Target: At home tinkerers, renters, car owners

- Certification required for electrical / plumbing; no vetting for furniture or car basics
- Cultural / local context matters (voltage, screw types etc.)

Live Translation

“Apparently they don't understand Canadian French in France”

Target: Travelers, immigrants, expats, remote workers

- No vetting required
- Humans understand nuance, etiquette, tone better than AI
- Helps bridge cultural gaps AI misses

Core Business Model (B2C)

Pay-As-You-Go

Users pay only for the time they use - no subscriptions, no commitment.

Why it works:

- Low friction to try helpdesk
- Perfect for users with simple, one-off problems

Starting at
\$0.22/min*

A user stuck updating their phone pays ~\$0.66* for a 3 minute call

Subscriptions (future implementation)

Monthly access plans for regular users who want more convenience and savings

Why it works:

- Encourages loyalty
- Predictable recurring revenue
- Ideal for students, professionals, frequent travelers

Sample tiers:

- Starter – 3 sessions / month - \$9.99
- Unlimited - \$24.50 / month

Bridging the Gap

Tools like Be My Eyes, Fiverr, and ChatGPT solve pieces of the puzzle – but none combine **real-time, general-purpose human help** with structure, scale, and monetization

Helpdesk is built like *Be My Eyes* – **But for everyone**. It's what happens when human insight is made instantly accessible, across verticals, with verified experts.

Fully Volunteer / Cause-
Based

b helpdesk

Helpdesk's positioning

Fully Automated Tools

For The Helpers: Monetize Everyday Knowledge

No commitment

Helpers come online whenever they want

We take care of everything else

Payment, security, reporting, and more

Zero cost to join

No subscription fees or listing charges

Built for all skill levels

Basic help requires no certifications

Pay-per-minute earnings

They earn for every minute they're helping

Anyone with useful knowledge can become a helper – from the tech-savvy student to the off-duty plumber.

Smart Vetting. Scalable Oversight.

Onboarding Requirements

ID Upload & Facial Verification

All helpers must verify their identity through a government issued ID + facial recognition

Category-Specific Vetting

Basic tech – Open entry

Education – Certification required

DIY (Plumbing & electrical) – Certification required

DIY (Remaining) – Open entry

Live translation – Open entry

In-house admin team reviews credentials

Ongoing Quality Control

Real Time Call Reporting

Helpers and users can flag / report one another

Call Recordings

All calls are recorded for playback & admin checks

Call Time Monitoring

Long calls are flagged for review based on category / sub-category average

Skip-to-Skip Tracking

Recurringly skipped helpers are automatically flagged and investigated

Future Tech Integration

AI Assisted Moderation

Automated tone analysis & abuse prevention.

Built for Enterprise. Designed for Scale.

Law Enforcement & Public Services

Instant citizen support, accident assessment, and digital policing

DIY / Retail

Live step-by-step guidance from store reps on tools, furniture, or setup

News & Media

Live footage & citizen journalism for events or crises

Smart Government

Real time citizen support for navigating government services

DIY / Retail

On-demand legal help & pro-bono matchups

Tourism

Cultural tips, travel guidance, and historical insights

Call Center Replacement

Replace traditional call centers with smart, global employee routing

Revenue Model

- Per-minute call billing at fixed corporate rates
- Department-level licensing for large entities
- Custom integrations (e.g., SmartGov apps, CRM links)

Our B2B Targets

Law enforcement & public services

شرطة دبي
DUBAI POLICE

Smart Government

Tourism

DIY / Retail

Legal

Call center deletion / reduction

News Agencies

Upcoming MVP

1

User reaches out via Whatsapp

“Need help changing a tire, I’m stuck on the side of the road”

2

Admin team reroutes the request

An admin forwards the received text to a WhatsApp group consisting of helpers

3

Helper confirms availability

The admin sends a google meets link to both the user and helper

4

Real-time support call begins

The user, helper, and admin join the call

5

Payment sent post-call

Users receive a payment link

Helpers get paid at the end of each day

Where we are now

90% Platform Completion

MVP ready to launch this month

Fully bootstrapped | zero external funding to date

A functional platform built with real people in mind

We prioritized Product over Pitch, and it shows

We've taken helpdesk as far as we can alone.

We're now looking for a partner who not only brings capital, but vision, expertise, and belief that not everything can be solved by an algorithm

How we've funded helpdesk without dilution

Rather than chase funding before we had a product, we made a strategic decision:

While helpdesk was being developed, we launched a separate company in Oman – MSM Investments – to generate predictable, daily revenue, via vending machines to fund helpdesk's development.

This wasn't a pivot – it was a temporary bridge to ensure helpdesk could grow without dilution or pressure to monetize too soon

Now that the platform is 90% complete, and MSM is fully operational (run by Mohammed Al Maawali), Mohammed Al Sabagh is able to focus solely on launching helpdesk.

We've proven our resourcefulness, we've built our own runway, now we're ready to take off with the right partner.

The Founders

Mohammed Al-Sabagh

An Omani national born to an Emirati mother in Dubai. He spent his formative years in Muscat before relocating to Dubai in 2012. In 2016, Mohammed attended the prestigious Institut Le Rosey boarding school in Switzerland and later pursued his studies in the UK. He graduated from the University of Reading with a BA in Business Management. Following his studies, Mohammed joined Grant Thornton's M&A and Transactions Advisory team in Dubai as an Associate Consultant in 2023. There, he managed valuations, feasibility studies, sell-side transactions, and buy-side transactions across various industries. During the Covid19 pandemic, Mohammed also worked as an ad-hoc Operations Analyst at Muscat International Airport with Supply International, ensuring the seamless operation of the airport's PCR testing facilities.

Mohammed Al Maawali

Having graduated from the University of Birmingham in the UK with a BA in Materials Science and Engineering, Mohammed Joined The Foreign Ministry of Oman as an assistant engineer in the Peaceful Nuclear office in 2024, which oversees safety regulations, medical applications, environmental monitoring, education, and international collaboration related to nuclear technology. During his studies Mohammed also worked at Energy Development Oman (EDO) as an intern, assisting with data analysis, research on energy projects, support ongoing projects, help prepare reports and presentations, and participate in meetings and discussions about renewable energy and sustainability initiatives.
